The retail environment is changing.

Do you have the most capable hardware, consumables and software to meet evolving consumer and industry trends?

Retail Refresh

Do you need a receipt printer that streamlines your POS process?

Receipt Printers and Consumables

How the right receipt printer can make a difference to your business:

A faster printer allows the checkout process to move along more quickly, reducing customer wait times. Printers with paper saving modes and economical print speeds helps to minimise additional running costs. A higher DPI will produce much sharper and clearer text and images; this is especially important if you are printing logos, coupons or advertisements.

Thermal printers come in a variety of cutter options; consider your environment and frequency of use to determine the best option. If you are printing in a kitchen, note that the operating temperature and humidity level can impact the printer's lifespan. Quality of paper may impact the longevity of your print. If you are using poor quality paper, it can quickly wear out the printhead, requiring more frequent maintenance.

A receipt is your message to your customers

A receipt is more than just a customer's proof of purchase, it's a gateway for your next sale. Many customers will retain their receipt in their wallet or bag. Use your receipt as a form of advertising; keep your business top of mind many months after the customers purchase.

Element RW80L

Thermal Receipt Printer
Ideal For Budget Printing

Read More

RW80L-001
